There are those who adore the boldness of Manhattan and the striking contrast of black and white. Others simply want to succumb to the warm, beguiling colours of tropical islands. Whilst some dream of exotic faraway lands or the opulence of precious silks and velvets. There are those who prize the rugged beauty of old materials from 1950s factories. Whilst others waft on a romantic cloud of lace and roses. Does the sea and the nuances of its stunning colours call you? Or perhaps, instead, you hanker after the freshness and scents of the countryside.

Whatever your style, Fato knows just how to interpret it and transform a mere table setting into a unique, sensorial experience.

Green is not just a colour. It's a lifestyle. It's to live in harmony with the world. All about the journey, not just the destination. Slow, not fast. Quality and not quantity. It is essentiality and purity of form. It's a preference for natural colours and materials. Nuances range from subtle shades of hemp to bolder, browner earthy tones through to brilliant green, the colour that distances us from the frenetic pace of city life like no other. A perfect balance of colours, patterns and materials to transform any environment into a calming haven.

A love of the essential. Self-assured contrasts of black and white. The notion of pure geometry. The sober elegance of neutral tones. The key phase is “less is more”. Modern Design is the interpretation of minimalism in all its forms. A dialogue with decor in which understatement becomes a synonym for pure elegance.

America ‘50 is back. Think urban mood, a hint of vintage, a touch of the rough and ready. The Industrial line with its “used” look may hark back to the past but it is surprisingly avant-garde when it comes to its approach of recycling, transforming, reviving. Its style is metropolitan, decisive, raw. Concrete, bricks, exposed pipes. Items reclaimed from old factories and given a new lease of life. Materials which proudly bear their age: wood, iron, leather. The result is bold, masculine design, a striking fusion of disparate elements: the randomness of the casual, the imperfection of the handmade and the coldness of metal.

Tales of distant lands, secrets of Eastern and African tribes, fusions of style and cultures. Settings that bewitch with animal, eastern and Arab patterns. The geometry of Berber carpets. Lanterns in rice paper. The fragrance of spices. A palette of colours evoking the heat of the earth. Ethnic Style brings the warm soul and inimitable flavour of faraway destinations to your venue.

Storie di terre lontane, segreti di popoli orientali e africani, fusioni di stili e culture. Atmosfere che incantano con motivi animalier, orientali o arabeggianti: le geometrie dei tappeti berberi, le lanterne in carta di riso, il profumo delle spezie. Una tavolozza di colori che ha il calore della terra. Lo stile Etnico scalderà ogni locale con l’anima ed il gusto speciale di un paese lontano.
